

## **FOR IMMEDIATE RELEASE**

### **MEDIA STATEMENT**

#### **HEADLINE 11<sup>TH</sup> SYMPOSIUM ON DISEASES IN ASEAN AQUACULTURE (DAA11) 2020**

1. We are pleased to inform you that the 11th Symposium on Diseases in Asian Aquaculture (DAA11) will be held on **29th September to 2nd October 2020 at the Borneo Convention Centre Kuching (BCCK), Sarawak Malaysia.**
2. This high profile triennial event which is jointly organized by the **Fish Health Section of the Asian Fisheries Society (FHS-AFS)** and the **Department of Fisheries Malaysia** under the **Ministry of Agriculture and Agro-based Industry** together with the **Ministry of Modernisation of Agriculture, Native Land and Regional Development Sarawak (MANRED).**
3. The DAA11 symposium **aims to combine intellectual stimulation while exploring the nature of Sarawak.**
4. The objectives are **to promote effective interaction and cooperation among those involved in aquatic animal health research; and to focus on aquatic animal health related issues by disseminating technical knowledge and experiences in all aspects of aquatic animal health.**
5. A lot of activities will be organize for participants. You can **gain latest information and input regarding aquatic animal health, exchange and sharing ideas** with researchers and other participants. Besides that, all participants will get the opportunity in **sharing the outcome of research** done by researchers.
6. There will be interesting showcase of aquatic animal health services and products brought by organizer.

7. For those who interested to join this symposium are advised to make registration as soon as possible to make sure you are entitle for an **early bird fee registration. This offer is valid starting from 10<sup>th</sup> January until 15<sup>th</sup> August 2020.** The normal price will be charged after that period.
8. We are now calling for online abstract submission. For more information about the symposium and online registration, **please visit DAA11 website at <http://www.daa11.org>** starting from 13 January 2020. Please feel free to **contact our secretariat at [daa11@dof.gov.my](mailto:daa11@dof.gov.my)** for assistance.

### About DAA Symposia

"Diseases in Asian Aquaculture" (DAA) series is held once in every three years by The Fish Health Section of the Asian Fisheries Society (AFS-FHS). AFS-FHS was established on January 30, 1990 at the Third Meeting of the Asian Fish Health Network (AFHN) at the Faculty of Marine Science and Fisheries, University Pertanian Malaysia (UPM). Since then, DAA symposia have been held in Indonesia (DAA1), Thailand (DAA2 and DAA3), the Philippines (DAA4), Australia (DAA5), Sri Lanka (DAA6), Taiwan (DAA7), India (DAA8), Vietnam (DAA9) and back to Indonesia (DAA10). After 30 years of AFS-FHS establishment, DAA11 will be held in Malaysia for the first time.

The DAA11 symposium aims to combine intellectual stimulation while exploring the nature of Sarawak. DAA11 anticipates the attendance of 400-500 delegates from 20-30 countries which will be held over four days. With the chosen theme: "Land of Adventure: Exploring Aquatic Animal Health for Sustainable Aquaculture", main topics will cover Biosecurity in Aquaculture, Epidemiology, Detection method/Diagnostic, Prevention & Control Measures and cutting-edge research in fish and shrimp health management. There will be ample time scheduled for networking, field trips, and social functions during the Symposium. Trade displays will be exhibited throughout the Symposium.

The National Organizing Committee of DAA11 is proud to announce the introduction of the 3-Minute Pitch (3MP), at the end of each session. This session is an extended form of an elevator pitch that was introduced in DAA10 (2017). The 3MP session aims to encourage more oral presentations and serves as a platform for researchers to highlight the impact of their research to a wider audience.

### Objective

- To promote effective interaction and cooperation among those involved in aquatic animal health research.
- To focus on aquatic animal health related issues by disseminating technical knowledge and experiences in all aspects of aquatic animal health.

### Scientific Programme

2 plenaries	6 sessions
I. State of Aquaculture	I. Biosecurity in Aquaculture
II. Drivers and pathways of disease emergence in aquaculture	II. Epidemiology (Parasitic, Bacterial & Viral diseases)
	III. Detection method/Diagnostic (Parasitic, Bacterial & Viral diseases)
	IV. Prevention & control measures
	V. Trends in fish health management
	VI. Trends in Shrimp health management
